PROFILE

Aspiring software developer with a solid background in database systems, programming, and problem solving. Competent in C#, Java, Python, and SQL, having developed academic projects in the database, mobile, and web domains. Eager to contribute to creative projects where scalable software solutions are driven by technical problem solving, flexibility, and teamwork.

SKILLS

- Databases** - MySQL, SQL
- Tools** - Android Studio, Visual Studio, GitHub, VS Code, Figma, Jira, Postman, AWS
- Programming Languages** - Python, C#, Kotlin, PHP, JavaScript, HTML/CSS, Dart
- Frameworks** - Flutter, Laravel
- Soft Skills** - Problem Solving, Adaptability, Team Work, Communication, and Time Management

PROJECTS

- Coffee Shop Platform (HTML, CSS, PHP, MySQL, Laravel)** - Created a dynamic website for a coffee shop featuring menu management and order processing.
- Coffee Shop Mobile App (Kotlin, Flutter)** - Created a mobile application with features for managing customer profiles, placing orders, and browsing menu products.
- Library Management System (C#, MySQL)** - Developed an application with features such as book borrowing, fine management, and member management.
- Hospital Management System (HTML, CSS, JS)** - Created a front-end system that includes features for product management and appointment scheduling.
